

Current PTA Project: Academics

How have recent events affected the expectations of tertiary institutions regarding our pupils? Are these adjusted expectations short or long term? What adjustments, if any, could Edinburgh Steiner School make to ensure our pupils' all-around competitiveness?

These are some of the questions members of the Academics subcommittee of the PTA will seek to understand, while working alongside the teacher-led Advanced Highers Working Group, formed in October 2022 (Kirsty Macdonald Russell - Careers, Alistair Pugh - SQA Coordinator and Deirdre Hill - Steiner Waldorf Pedagogy).

Interested parents who have ideas or experience with this important area are welcome to join this subcommittee, in particular, experienced research gatherers. Your workload will be as light or heavy and your time commitment as short or long as your schedule allows. Please contact one of the Committee Members working on this project:
